Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/786,404	Applicant(s) SHIBASAKI ET AL.	
	Examiner MELVIN H. POLLACK	Art Unit 2145	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 24 February 2004.
- 2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 20 April 2006 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

6. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the definitions of various terms not currently in the

Art Unit: 2145

specification, and/or their relationship to elements within the specification that are not in the claims. Such in-claim undefined elements are, for example, information-providing apparatus, information-recording apparatus, and sub-elements such as ID-information-acquisition device and other devices. It is unclear how these devices relate to specification-defined apparatuses such as AV apparatus, service server and contents server.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Maher et al. (7,213,266).

9. Maher is drawn to a method and system (abstract) of managing copyrighted media content (col. 1, line 1 – col. 3, line 45), on an information-recording apparatus (Fig. 1, #108, Fig. 9, herein known as the client) in communication with an information-providing apparatus (Fig. 1, #106, 112, herein known as the authentication and application servers). In particular, the client sends copyright and user ID information to the server (col. 3, line 45 – col. 4, line 25), and the authentication server determines whether the credentials are valid (col. 4, lines 25-55), such that the client may access the information and store it (col. 5, line 25 – col. 7, line 25). Upon authentication, the application server will also send to the client trial information (col. 7, line 25

Art Unit: 2145

– col. 8, line 15). Cost information may also be taken into account (col. 10, line 30 - col. 112, line 50).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on DRM in home networks and vehicular networks.
